

STATEMENT OF PURPOSE

RS20767C3

Much of the current Commercial Feed Law is cumbersome and confusing. This legislation will attempt to make the program more user-friendly and less intrusive by clarifying the responsibilities of the commercial feed registrants, manufacturers and distributors. The legislation will clarify label review requirements and expedite registration processes for commercial feed.

This legislation repeals Section 25-2706, Idaho Code, which requires quarterly tonnage reports and inspection fees. This amendment will make the program more efficient and effective. Repealing Section 25-2706, Idaho Code will eliminate the tonnage reporting requirement and inspection fees, and will implement a uniform registration fee.

The changes in this legislation will also require ISDA to provide notification prior to inspection and also provide receipts for samples taken during an inspection.

FISCAL NOTE

The Commercial Feed Program is a dedicated fund program, and there is no impact to the General Fund. Proposed changes to the fee structure may reduce overall program revenue.
